

Provincial Long Term Care Partnership Council

Key messages - November 2023

#1

We discussed Resident-Directed and Resident-Centred Care definitions to determine what terms our council intends to use and share. A robust discussion on how these terms fit together unfolded. A group decision was made to further define both terms and explore how this understanding could help us advance a shared vision for LTC together.

#2

Our Communication Plan was finalized and work will unfold to action the components of the initial communication. Ongoing communication channels that allow the council to share what we're up to and hear from LTC community members continuously will also be initiated (such as these Key Messages and others).

#3

We heard biographies from members as a way to get to know each other better and understand each other's lived experiences in Long Term Care. We will be doing biographies for all members over the coming months.

Next Meeting: Christmas Social - December 19th.
