

At Risk of Mpox?

Get Vaccinated

How is Mpox spread?

Mpox is spread through ***direct skin-to-skin contact***.

People 18 years and older who are considered ***high-risk of potential exposure*** or close contacts of a case may be offered the vaccine.

Where do I call for more information?

Call **Healthline 811** to assess your risk of monkeypox, access testing, or receive a vaccine referral.

Vaccinations may be provided pre or post exposure
